Program/Department

**Hydrology Days**

April 25 – 27, 2022

# Student Showcase Slide Requirements

Participants must adhere to the following guidelines:

- Contestants must have a NAME slide
  - Place this slide BEFORE your content slide
- Prepare slide in 16:9 aspect ratio
- **Slides must be uploaded to the presentation computer folder at least 2-hours prior to the showcase**
  - **We will not have time to upload your slides right before you present!**

*Note: Presentations may be filmed; your slide may be embedded on the Hydrology Days website and/or posted online.*

# Suggested Slide Content

Though not required, the committee recommends you consider the following format to organize your presentation. **Keep slides simple.** Some lightning speakers try to cram many concepts into each slide, but that's a mistake. Images should be as economical as words, holding just enough information to make important points without visual overload.

## Background

- Hook the audience in! Start with something that makes them want to hear more (e.g. a quote, a statistic, a question for the audience).
- Set the stage: Identify the issue you are addressing.
- Specify the study's motivations—hypothesis and objective(s)

## Methodology

- Describe how you approached your research question.
- Remember, only include information that is absolutely necessary for the audience to understand your project

## Major Findings

- Identify the key findings.
- You may want to use simple diagrams, graphs, and figures to tell this part of your story.

## Conclusions and Implications

- Identify the significance of your findings.
- **Describe why this is useful to the community (e.g., real-world applications, future directions).**
